

From Learning Loss to Academic Gains

Catapult Learning's Summer Journey program offers robust educational opportunities and engaging activities that allow students to learn throughout the summer while also having fun. Our comprehensive program addresses academic, social, and emotional learning by incorporating instruction, enrichment activities, and family support elements.

Literacy Intervention

Support readers and build their confidence and comprehension skills with personalized, literacy-focused instruction in reading, writing, speaking, and listening. Our AchieveLiteracy™ intervention programs provide intensive, small-group instruction for students struggling with grade-level content and concepts. This is achieved through explicit instruction across the **Big 5**.

Big 5

- Phonics
- Phonological Awareness
- Fluency
- Comprehension
- Vocabulary

Math Intervention

Based on research conducted by the National Council of Teachers of Mathematics and the National Mathematics Advisory Panel, our AchieveMath™ intervention program helps learners build confidence and improve their math skills—from basic concepts and computation to problem solving, data collection, geometry, and algebra.

Life Skills

Throughout Summer Journey, life skills are a point of emphasis. Teaching developmentally appropriate skills connected to social-emotional learning competencies cultivates the executive functioning skills students need to succeed in the classroom and beyond. Family support is also an important component of the Summer Journey program. We offer academic and family counseling, family workshops, and 1:1 wellness or academic check-ins so families remain engaged and up-to-date on their child's progress.

STEM

Catapult Learning's turnkey STEM, STEAM, and Robotics enrichment programs provide engaging ways for teachers and students to focus on the development of problem-solving and critical-thinking skills. Our popular enrichment programs employ proprietary project- and inquiry-based curriculum, expertly trained instructors, and all the supporting materials needed to seamlessly integrate customized enrichment learning into your academic offerings.

What is STEM

-  Science
-  Technology
-  Engineering
-  Mathematics

Catapult's program is a true integration of all four subject areas.
